THE NEW ZEALAND

JOURNAL OF AGRICULTURE.

VOLUME XVII.

(July – December, 1918.)

GENERAL INDEX.

A.

Acorns for poultry, 62.
Agricultural and pastoral statistics, 1917–18, 187, 189.
Agricultural shows, 256.
American strawberry varieties under test at Motueka, 352.
Annual sheep returns, 1918, 254.
Answers to correspondents, 59, 122, 183, 250, 314, 381.
Apiary, the (monthly notes), 50, 115, 177, 242, 307, 370.
Apiary training at Ruakura, 273.
Apple-tree root-system revealed by flood, 79.
Auxiliary crops for dairy herd, 122.

B.

Barberry for cattle-proof hedge, 123.
Basic superphosphate, how to make, 381.
Bee-management, the "Hand" hive and system of, 74.
Blackleg, inoculation of calves against, 298.
Blindness in sheep, 185.
Broad beans and humble-bees, 124, 365.
Brown-rot in America, control of, 128.
Buckwheat, cultivation of, 252.
Bulls, Department's Weraroa sale of pedigree dairy, 192.
Burning off fern land, 316.
Bush-sickness investigation, 336.
Butter-boxes, standard size for, 320.

C.

Californian thistle, destroying by cultivation, 5.
Californian thistle, destruction of, 62.
Calves with foot trouble, 60.
Canterbury Seed-growers' Association: The first three years' work, 80.
Cape daisy, control of, 273.
Care of the horse's foot, 329.
Carrots and mangolds, comparative feeding-value of, 252.
Carrots, growing of field, 251.
Carrying-capacity of farms, tillage measures for increasing the, 194.
Cattle-proof hedge, barberry for, 123.
Certificate-of-record cows: The New Zealand milk and butter-fat champion, 23.
Certificate-of-record testing, 87, 274.
Citrus-fruit culture in New Zealand, 154.
Clover, wild white, 252.
Concrete fencing-posts, 345.
Control of Cape daisy, 273.
Co-operation, central packing, and cool storage in the fruit industry, 337.
Cow choking on turnips, 183.
Cow with mange, 62.
Cow-pox, remedy for, 250.
Crested dogstail and pasture mixture, 185.
Crickets, control of, 252.
Crops for lamb-raising, 135.
Cud, remedy for loss of, 250.
Cultivating implement, an improved, 357.
Curing and tanning skins, 383.

D.

Dairy herd, auxiliary crops for, 122.
Dairying in Friesland, 354.
Danthonia-growing on fern country, 123.
Demodecic mange in pigs, 326.
Dodder in lucerne, 317.
Dog with skin trouble, 316.
Drain-making, 316.
Dressing for seed oats, 184.
Dried-milk industry, the, 334.
Dry-rot of turnips: Suggestions regarding control, 70.
Duck-eggs, colour of Indian Runner, 251.
Dyes, manufacture of, in Britain, 163.
Dyestuffs, indigenous vegetable, 136.

E.

Economic bearing of hover-flies, the 129.
Electro-culture: A negative result, 128.
Ensilage, 147, 201.
Ergotism, a case of, 263.
Experimental work at the Ruakura Apiary, 24.
Experimental stations, the Department's, 320.
Export of mutton and lamb, 58.

F.

Factories, &c., registration of, under Dairy Industry Act, 44.
Farms and homes for discharged soldiers, 64.
Farriery, some points in, 329.
Fencing-posts, making concrete, 60.
Fencing-posts, concrete, 345.
Fencing-posts, preservative treatment of, 89.
Fern country, growing of danthonia on, 123.
Fern land, burning off, 316.
Fertilizers, importation of: Annual returns, 31.
Fertilizers, importation of: Quarterly returns, 190, 319.
Field-carrots, growing, 251.
Field-pumpkins: Wanganui experience, 220.
Flax-grub, the New Zealand, 209.
Foxglove, control of, 185.
"Flying-beetles" attacking pear-trees, 315.
Food, military production of, 127.
Food-production and the war, 126.
Foot-and-mouth disease in England, 358.
Foot trouble, calves with, 60.
Forests, the native, 376.
Founder in horses, 314.
Fowl-manure for vinery, 125.
Friesland, dairying in, 354.
Fruit-cases, Pinus insignis for, 235.
Fruit, importation of fresh, 191.
Fruit industry, co-operation, central packing, and cool storage in the, 337.
Fruit-trees, grading of, 358.
Fulghum oat, the 313.

G.

Garden, the (monthly notes), 54, 119, 179, 246, 311, 374.
Germination of vegetable-seeds and garden cultivation, 359.
Goats, the keeping of milking, 328.
Good-roads movement: Victorian system of main-road administration, 216.
Gore experimental area, 286.
Grading of fruit-trees, 358.
Grain-weevil, control of, 253.
Grapes, importation of, 380.
Grass-grub, control of, 250.
Grassland in school-work, the study of, 289.
Grassland problems, some, 321.
Grass-lands of New Zealand, the, 35, 140.
Greasy-heel of horse, 317.
Grimm lucerne, introduction in New Zealand, 19.

H.

"Hand" hive and system of bee-management, the, 74.
Hazel-nuts, growing, 61.
Health management of young sheep, 1.
Home-saving of vegetable-seeds, 221.
Horse, greasy-heel of, 317.
Horse with lice, 382.
Horse's foot, care of the, 329.
Horses, founder in, 314.
Hotbeds, making of, 318.
Hover-flies, the economic bearing of, 130.
Humble-bees and broad beans, 124, 204, 365.
"Hustler" cultivator, 357.

I.

Importation of fertilizers, 31, 190, 319.
Importation of fresh fruit, 1917–18, 191.
Importation of grapes, conditions for, 380.
Improved cultivating implement, an, 357.
Indigenous tans and vegetable dyestuffs of New Zealand, the, 136.
Insects, limitation of injurious by beneficial species, 12.

K.

Kumara-culture, 84.
Kumaras, storing, 27.

L.

Lambing, the season's, 320, 384.
Lamb-raising, crops for, 135.
Lambs with sore noses and lips, 381.
Lantana shrub, the, 73.
Lea, a four-year, 383.
Leakage of milk in heifer, 318.
Lemon-trees, planting young, 60.
Lice on cows, 315.
Lice on horse, treatment for, 382.
Lime and superphosphate, mixing, 123.
Limestones of New Zealand, further analyses, 98.
Limitation of injurious insects by beneficial species, 12.
Linseed-growing, land for, 125.
Liquid-manure distributor, 61.
Live-stock pedigree, 65.
Local Railway Act: The Ohai District Railway, 143.
Loganberry-plants, spraying, 183.
Lotus angustissimus, 184.
Lotus angustissimus for hay, 59.
Lucerne after root-crop, 125.
Lucerne combinations, 318.
Lucerne, dodder in, 217.
Lucerne establishment, conditions for, 62.
Lucerne, Grimm, 19.
Lucerne-growing in the Westport district, 162.
Lucerne-growing: The Manawatu, Wanganui, and Taranaki districts, 265.
Lucerne on mole-drained land, 186.

M.

Maize-growing for northern hill country, 251.
Mange, cow with, 62.
Mange, demodecic, in pigs, 326.
Mangolds and carrots, comparative feeding-value of, 252.
Mangolds for pigs, 125.
Mangolds, rot in, 183.
Mangold-seed saving, 122.
Manuka, dealing with spread of, 124.
Manure, liquid, distributor, 61.
Medicinal plants of New Zealand, 6.
Methods of turnip-seed production in Europe, 168.
Military production of food, 127.
Milking-goats, the keeping of, 328.
Milk-pasteurization for cheese, 290.
Mole-drained land, lucerne on, 186.
Motuihi, pasture renovation and liming at, 1.
Moutere Hills, orchard cover-crop experiments on the, 364.
Mustard for green manure in glass-houses, 208.
Mutton and lamb, export of, 58.

N.

Nasal catarrh in cattle, 59.
Native forests and forestry matters, the, 376.
Notes on some Poverty Bay soils, 196.
Nurseries, State, 365.

O.

Oat, the Fulghum, 313.
Oats, areas under, 313.
Oats threshings, 58.
Oats, dressing for seed, 184.
Ohai District Railway, the, 143.
Orchard, the (monthly notes), 45, 110, 170, 237, 302, 366.
Orchard cover-crop experiments on the Moutere Hills, 364.
Orchard experimental work by Stoke Fruitgrowers' Association, 225.
Orchards, registration of, 191.
Orchard sprays and spraying, 103.

P.

Paspalum for high country, 185.
Passion-fruit culture, 232.
Pastoral and agricultural statistics, 1917-18, 187, 188, 189.
Pasture development, 381.
Pasture mixture for bush farm at Pirongia, 314.
Pasture renovation and liming at Motuihi, 1.
"Pea" in cow's teat, 253.
Peat bogs, reclamation of, by gravelling, 9.
Pedigree live-stock: Development of breeding in New Zealand, 65.
Pig position in New Zealand, the, 205.
Pig with ear trouble, 253.
Pigs, demodecic mange in, 326.
Pigs, mangolds for, 125.
Pig troubles, 122.
Pine-tree seedlings, raising, 250.
Pinus insignis for fruit-cases, 235.
Plant-improvement work at Weraroa, 299.
Plantations, State, 365.
Poisonous, suspected, and medicinal plants of New Zealand, the, 6.
Pork-production, some points on, 206.
Potatoes, spraying, 315.
Poultry, acorns for, 62.
Poultry, sunflower seed for, 184.
Poultry-keeping (monthly notes), 48, 113, 174, 239, 306, 369.
Poultry standards: The ideal laying and breeding type, 282.

Poverty Bay soils, notes on some, 196.
Prairie-grass growing, 186.
Preservative treatment of fencing-posts, 89.
Priming of table cockerels: Demonstration at Christchurch, 28.
Pumpkins, field, 220.

R.

Rabbit nuisance in Central Otago, 291.
Rabbits, destruction of with strychnine, 164, 215, 263.
Railway, the Ohai District, 143.
Ratstail-grass, eradicating, 382.
Reclamation of peat bogs by gravelling, 9.
Registration of orchards, 191.
Roads: Victorian system of main-road administration, 216.
Root crops for Taranaki conditions, 382.
Root-growing in middle Taranaki, 90.
Root-system of apple-trees revealed by flood, 79.
Rot in mangolds, 183.
Ruakura Apiary, experimental work at the, 24.
Ruakura Apiary, training at, 273.
Rust-resistant oats for sheaves, 183.

S.

Seed-growers' Association of Canterbury, 80.
Seed-testing notes, 42, 95, 165, 295, 347.
Seeds, home-saving of vegetable, 221.
Seed-oats, dressing for, 184.
Septic-tanks, 362.
Sheep, blindness in, 185.
Sheep, health managment of young, 1.
Sheep-maggot flies, 362.
Sheep returns, annual, 64, 254.
Sheep-skins, dressing for, 316.
Sheep-worms in pastures, 383.
Shows, agricultural, 256.
Silver-blight, trees affected with, 382.
Silver-poplar suckers, 253.
Skins, curing and tanning, 383.
Soils, notes on some Poverty Bay, 196.
Soils of the North Island, studies on the lighter, 257.
Soldiers, farms and homes for discharged, 64.
Spraying loganberry and strawberry plants, 183.
Spraying potatoes, 315.
State nurseries and plantations, 365.
Stock slaughtered, 146.
Stoke Fruitgrowers' Association, orchard experimental work by, 225.
Stratford Model Dairy Farm, root-growing at, 90.
Stratford Model Dairy Farm: The first year's operations, 231.
Straw-ashes for fertilizer, 251.
Strawberry, American varieties, 352.
Strychnine for destruction of rabbits, 164, 215, 263.
Sudan-grass, 186, 252.
Sunflower-seed for poultry, 184.
Superphosphate and lime, mixing, 123.
Superphosphate, how to make basic, 381.

T.

Tans, indigenous, 136.
Taro-plant, cultivation of, 317.
Threshings, wheat and oats, 58.
Tillage measures for increasing the carrying-capacity of farms, 194.
Totara hedge, 384.
Tractor experience at Weraroa, 195.
Trade between Australia and South Africa, 380.
Turnip-seed production in Europe, methods of, 168.
Turnips, cow choking on, 183.
Turnips, dry-rot of, 70.

U.

Unthrifty pony, 318.

V.

Vegetable-culture (see Garden, monthly notes).
Vegetable-seeds, germination of, 359.
Vegetable-seeds, home-saving of, 221.
Vegetables, times for planting out, 383.
Viticulture (monthly notes), 53, 117, 245, 309, 373.

W.

Walnut-blights, 184.
War, food-production and the, 126.
Weevil, dealing with in shed, 61.
Wekas protected, 5.
Weraroa, plant-improvement work at, 299.
Weraroa, sale of pedigree dairy bulls, 192.
Weraroa, tractor experience at, 195.
"Whale-feed" as fertilizer, 294.
Wheat and oats, areas under, 313.
Wheat and oats threshings, 58.
Work for the coming month, 45, 110, 170, 237, 302, 366.
Worms, treating colt for, 124.

Page

Health management of young sheep—
One of the new grass paddocks at Motuihi 2
Some of the Motuihi 1917 lambs 3
A piece of the old pasture at Motuihi 4
The steading at Motuihi 5
Limitation of injurious insects by beneficial species—
Graph illustrating relation of *Xanthorhoe praefectata* to primary and secondary parasites 14
Live-stock instruction to school-camp class at Moumahaki 18
Grimm lucerne—
Plant of Grimm lucerne grown at Department's depot, Christchurch .. 20
Varying types of roots and crowns in lucerne 22
Trees and the sand-drift problem: Pinus insignis on seaward side of railway near Foxton 41
Seed-testing notes—
Relative size and shape of haresfoot-trefoil, white clover, and suckling clover 42
Dissection of one gram of white-clover sample 43
The "Deadman" super-cleaner device 52
Honey in grading-store, Wellington 63
The "Hand" hive 75
Apple-tree root-system revealed by flood: The washed-out apple-orchard at Brightwater 79
Certificate-of-record testing: Westmere Princess Pietertje—New Zealand champion milk- and butter-fat producer 88
Seed-testing notes: Relative vitality of high- and low-germinating lines of turnip and swede seed 96
The economic bearing of hover-flies—
Diagram of syrphid wing 130
New Zealand Syrphus-fly 130
Female of banded melanostoma 130
Abdomen of male 130
Syrphus-fly larva 131
Eggs of banded melanostoma 132
"Rat-tailed" larva 133
Common honey-bee and European drone-fly 134
Ensilage—
A simple derrick 149
Box for lifting soil for weighting stack 151
Method of using chain for tipping over box 151
Ensilage-stack, showing framework for weighting material 152
Lucerne-growing in the Westport district: Lucerne area on Waimarie farm 163
Seed-testing notes—
Typical "cheap" mixture in demand for rough country 166
Dissection of 2½ grams of "clover-mixture" sample 167
Leading pen of Black Orpingtons in last Milton feeding-test 182
Notes on some Poverty Bay soils: Effect of March–April, 1918, floods at Ormond 197
Ensilage—
Concrete ensilage silo under construction 202
Upper view of wooden moulds on silo wall 203
The American "corn"-binder 203
Pipe and thermometer for taking temperature 204
Mustard for green manure in glasshouses: Crop of mustard in Mr. Lunt's glasshouse 208

	Page
The New Zealand flax-grub—	
Graph illustrating seasonal life-cycle of flax-moth	212
Curves of larval activity of flax-moth	212
Milling Pinus insignis for fruit-cases near Hastings	236
Leading pen of White Rocks in last Milton feeding-test	249
Part of leg of young bull affected with ergotism	264
Certificate-of-record testing—	
Lady Pauline	277
Majesty's Eileen	277
Woodstock's Fancy Free	281
Poultry standards : Mr. E. B. Martin's champion White Leghorn pullet	285
Wallaceville Laboratory : Rear view, showing outbuildings	294
Seed-testing notes—	
Seeds of the Poa grasses	296
Drawings showing teeth on marginal nerve of palea of Poa-seeds	297
Shipping cheese at Wellington	301
Budding of fruit-trees	305
Specimens of demodecic mange in pigs	327
Care of the horse's foot—	
Section of horse's foot	330
Sole of the hoof	331
Seed-testing notes : The birdsfoot trefoils—	
Lotus major	348
Lotus hispidus	348
Lotus corniculatus	349
Lotus angustissimus	349
An improved cultivating implement—	
The " Hustler " cultivator	357
View of plane of implement	358
Dinah : Ruakura Milking-Shorthorn herd	361
Septic-tanks : Sewage-tank with subsoil filter trenches	363
